SUMMARY

Recent Full Stack Developer graduate experienced in JavaScript-based programming with a passion for developing scalable web applications and working across the full stack. I am looking to grow my skill set and kickstart my career.

TECHNICAL SKILLS

HTML5, CSS3, Bootstrap, Javascript, AJAX, JSON, OOP, SQL, Node.js, Express.js, React, Redux

TECHNICAL PROJECTS

Chat App - [Github](#) | [Demo](#) (add hyperlinks)

- Implemented real-time communication using socket.io for chat functionality, including private and temporary group messaging
- Created login and registration system connected to an SQL database for user storage and verification
- Designed UI to display online status, notifications, and messages using React, CSS, and Material-UI
- Utilized Express.js to handle HTTP requests and routing
- Implemented server-side logic to handle message and user data storage, retrieval, and manipulation using Express.js

Weather App - [Github](#) | [Demo](#) (add hyperlinks)

- Developed a weather app using React for front-end development
- Implemented an API to retrieve real-time weather data for multiple cities
- Utilized local storage to save and retrieve users' favorite cities
- Designed a user interface to display the current weather and five-day forecast for the selected city using React (maybe write that I used css or material ui)

Memory Game - [Github](#) | [Demo](#) (add hyperlinks)

- Developed a memory game using HTML, CSS, and Javascript for front-end development
- Used promises and async/await to handle asynchronous tasks and manage game state(check if I actually did this)
- Implemented a timer and points system using Javascript to track and display game progress
- Created a reset button using Javascript to allow players to restart the game
- Utilized DOM manipulation techniques to dynamically update the game board and display results

Currency Converter - [Github](#) | [Demo](#) (add hyperlinks)

- Developed a currency converter using HTML, CSS, and Javascript for front-end development
- Implemented an API to retrieve and convert currency exchanges rates in real-time
- Utilized DOM manipulation techniques to dynamically update the converter and display results
- Used Javascript to enable users to switch the "to" and "from" currencies and display the updated amount

EDUCATION

Full Stack Web Development, JavaScript program

Developers Institute, TLV Coding Bootcamp

Ramat Gan, Israel

09/2022 - 12/2022

Baruch Ivcher School of Psychology

Reichman University

Herzeliya, Israel

09/2019 - 08/2022

LANGUAGES

English - Native speaker

Hebrew - Proficient
